

Year 4

March 2019

What does this mean?

Rivers

Where do they start?

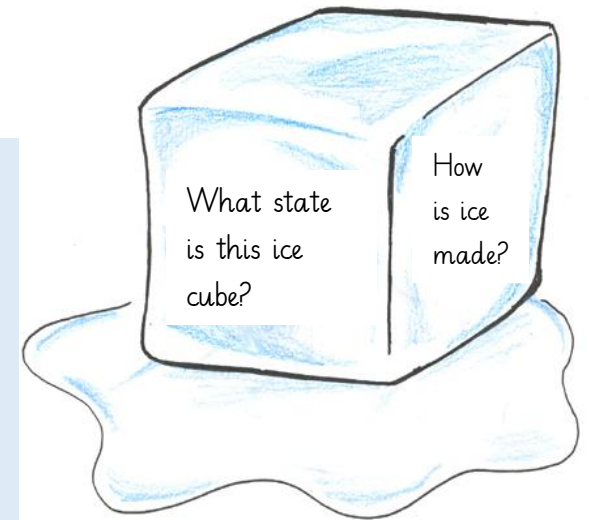

What happens on their journey?

How many famous rivers can you locate on a map?

Where do the rivers end?

Science - States of Matter

Is an object a solid, liquid or gas? How can we find out?
How does ice freeze? What happens in the process to turn ice into water?
What scientific investigations can help us learn about the rate ice melts?

The Water Cycle

This is the process of how water is used and reused.

How does the water cycle happen without us noticing?

Do you recognise any of the key vocabulary?
