

SCIENCE

**How are shadows formed?
How does light travel?**

How does the voltage of a battery impact the brightness of a bulb, or volume of a buzzer?

ART/D&T

We will be developing our sketching skills to produce landscape drawings.

We will use our scientific knowledge of electrical circuits, alongside our ability to design, in order to create model theatres with lighting.

Year 6 Summer Term

This half term, the children in Year 6 have many exciting events and activities to look forward to as they prepare for their transition to high school.

PSHE

The children will be discussing the changes they will experience when growing up, feelings and emotions and how to build healthy relationships.

Year 5/6 Production

High school transition events

Events & Activities

Bellboating and Regatta

Leavers' Assembly
