

We will be counting and sorting recycling materials, as well as extending our knowledge of place value.

RE - what makes us unique?

Music - listening, and exploring sounds

We will be investigating how the Earth is affected by rubbish and what we can do to help it.

Do you have any ideas?

We will be developing our vocabulary and thinking of exciting adjectives that we could use to describe different sea creatures and their habitats.

We can use them in our narratives!

shimmering vibrant
glistening scaly stormy

We will be thinking about how we can use language to persuade people to reduce, reuse and recycle.

Community:

Taking care of our local area.

Earth Caretakers

Year 1

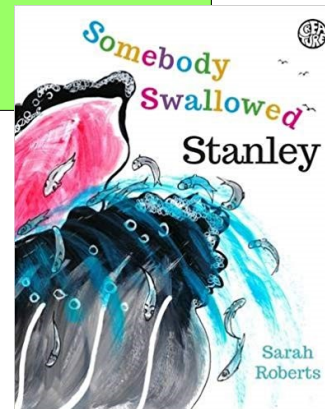

Year 2

Our Key Text is:

Someone Swallowed Stanley

by Sarah Roberts

How does plastic end up in the sea?

Key Skill for Life and Learning:

RESPECT

Where does our rubbish end up?

How can we reuse or recycle different materials?

Junk modelling!

We will be learning about different materials and their properties.

What material would you use to make a raincoat?

Why?
