SKINCARE

COSMECEUTICAL SKINCARE

There are a few key components to a well-structured skin care routine. The products you're using should be cosmeceutical grade. This means they are part cosmetic (products you can buy on the high street) and part medical grade (high potency lotions prescribed by the doctor). Cosmeceutical products are extremely well formulated to ensure they can penetrate deep beneath the surface of the skin and stimulate positive, long lasting changes to the skin structure. We are proud to offer our results-driven skin care ranges:

> **IMAGE Skincare**

> **ZO Skin Health & ZO Medical**

> **Heliocare, Endocare & RetriDerm**

NUTRACEUTICALS

Feed your skin from within.

Did you know that your skin is made up of 75% collagen? After the age of 25, you lose around 1.5% of this every year which leads to fine lines, wrinkles, lax and sagging skin. As the largest organ of the body, your skin will be last to get the protein from the food you eat. So it's really important to take an additional supplement to keep collagen levels high. Hydrolysed collagen (made up of small proteins) is absorbed quickly by the body and stimulates the body's own natural production of collagen. In clinical studies, this bioavailable form of collagen has been shown to significantly reduce wrinkle depth, increase elasticity and skin density and boost hydration levels. In other words, hydrolysed collagen is the secret to youthful skin. We are proud to offer our results-driven nutraceutical line, **Rejuvenated**.
